Durgesh Padwal *Python Developer*

durgeshpadwal729@gmail.com | Chiplun, Maharashtra | Linkedin | GitHub

PYTHON DEVELOPER

CSE Undergraduate specializing in Machine Learning with a strong technical foundation in Python, OOP principles, and FastAPI. Demonstrated capability in utilizing Pandas and NumPy to architect intelligent data pipelines, along with experience managing scalable software development lifecycles using GitHub.

EDUCATION

BE in CSE(AIML) 06/2023 – 04/2027 | Ratnagiri
Mumbai University
GPA: 8 Detail-oriented CSE undergraduate skilled in software development, DSA, and system design. Experienced in building scalable academic projects and eager to leverage strong problem-solving skills in an entry-level engineering role

SKILLS

Languages: Python, SQL

Libraries: Matplotlib, Numpy, Pandas

Tools: FastAPI, GitHub

Concepts: DBMS, DSA, OOPS

WORK EXPERIENCE

Software Development intern 06/2026 – 07/2026 | Pune
Wisdom Sprout

Machine Learning intern 12/2025 – 01/2026 | Mumbai
VASP Solution

PROJECTS

System that Detects Dataset Poisoning 01/2026 – 04/2026
Designed and implemented an AI-driven security framework that analyzed 1,000+ data points to protect machine learning models from data poisoning. Developed automated detection algorithms to identify and isolate malicious data, maintaining a 95%+ accuracy rate in model predictions and securing training pipelines against adversarial threats.

Multi-Tier Academic Workflow with RBAC 07/2025 – 11/2025
Designed and deployed a secure, web-based management platform to centralise and simplify the project lifecycle in academic institutions. Implemented a robust Role-Based Access Control (RBAC) system for Mentees, Mentors, Project Coordinators, and HODs, ensuring strict data privacy and tailored workflows. The platform digitalises the entire process from initial project assignment to final evaluation, improving administrative efficiency.

Sales Analytics & Predictive Forecasting Platform
Engineered a full-stack analytics platform by developing high-performance REST APIs using FastAPI for predictive data streaming, integrated with a Flask frontend that utilizes Pandas for bulk data processing, Plotly for dynamic KPI dashboards, and Scikit-learn for machine learning forecasting; fully containerized and deployed via Docker

CERTIFICATIONS

Python — Corizo Date: 07/2025 - Present

Machine Learning with Python — Date: 08/2024

Gen AI — Linked in Learning Date: 12/2022

ACHIVEMENTS

Model Accuracy
Engineered a Scikit-learn predictive sales forecasting model that achieved an accuracy rate of 90% on unseen test data

Codewars
Codewars Advanced Ranking
Achieved a 4 kyu rank on Codewars, placing in the top 23% globally by mastering complex Python algorithm challenges (Kata)
